

Dear Parents,

Further to feedback from both the Year One parent partner sessions and parent consultations, I have been in contact with Mathletics regarding using a tablet to complete activities.

To use Mathletics on a tablet, the company advise you to download the **Mathletics Student App** found in the play store on an Android device or in the i-tunes library of an apple device.

This will mean you will be able to use the **core activities** and **live mathletics**, but due to capacity limitations the rainforest, problem solving and dictionary cannot be accessed. The full site is available to use on a PC or mac.

The company are also happy for parents to contact them directly if you are having problems accessing the site from home. If you wish to contact them their number is 01173701990.

Sorry this is not quite the answer we were hoping for.

Many thanks

Jane Blake
