

My Money March

We have now got a shortlist of four charities that we may be supporting through our 'My Money March' activities. We would like all our families to be involved in the final selection of the charity. We are, therefore, going to have token boxes for each charity set up in the school entrance foyer for you to put your token into (a little bit like many supermarkets do!)

Please come into the school foyer, take a token for each member of your family and vote for your preferred charity by placing the token in the charity box.

The four shortlisted charities are:

13,000,000 people live below the poverty line in the UK, with individuals going hungry every day for a range of reasons, from benefit delays to receiving an unexpected bill on a low income.

The Trussell Trust's 400-strong network of food banks provides a minimum of three days' emergency food and support to people experiencing crisis in the UK.

AOG SCHOOL

Over the last few years at Goldfield we have been supporting the AOG school in Nepal. We have strong links with the school and its pupils.

We regularly sell Seema bags to support the AOG school too.

Nepal suffered a terrible earthquake in 2015 and although the school wasn't damaged the buildings where the Seema bags are made were. This money would help them to rebuild and help with the children's education.

Rennie Grove Hospice Care is a charity dedicated to providing care and support for patients diagnosed with cancer or other life-limiting illness and their families. They provide care and support for over thousands of patients and families in Herts and Bucks. They provide an unique 24/7 Hospice at Home Service, our Family Support services and a range of Day Services at Grove House.

Ollie was diagnosed with a brain tumour on the 19th May 2015. He underwent an 8 hour operation where only half of the tumour could be removed. Following this, he lost the ability to speak, swallow, stand, walk or use his right hand. He has had to re-learn all of these things. Ollie needs two more years of treatment at a cost of £440,000.
